

# Why Strengthen Your Pet's Immune System every day?

To Help Shield It From All This!

**Backyard** pesticides, fertilizers, bacteria, and viruses that attack your pet's immune system;

**Carpet** backing, which contains formaldehyde, tuolene, benzene, xylene, and styrene (Pregnant women are warned to avoid new carpets; but your pet gets to bury his nose in it every day);

**Pet Foods**, most contain hormones, pesticides, unregulated meat by-products, preservatives, grain and lactose (sources of allergies in many pets);

**Household Chemicals** (cleaning fluids, bug and rodent killer);

**Tap Water** (Some water is loaded with toxins and excess minerals. Do you drink bottled water? Does your pet?);

**Prescribed Drugs**, including Steroids and NSAIDs/Non-Steroidal Anti-Inflammatory Drugs (often causing cataracts, liver damage and kidney damage);

**Pet Treats** and **Supplements** (such as PetTabs) that are loaded with sugars and fillers, promote diabetes and liver problems in dogs and cats;

Stairs Hurt

Jogging Hurts

Cars/Trucks

**Climbing Down Stairs, Jogging on Pavement, Jumping Down from Furniture and Cars**, these are major causes of Hip, Bone and Joint Stress in both large and smaller breed pets;

**Mental Stress** weakens their immune system – babies separated from their litter, and grown pets left alone during the day suffer separation anxiety; traveling pets (including show dogs) get travel stress;

**Older Dogs and Cats** tend to have greater bone, joint and immune system problems;

**Genetic problems** in some breeds and blood-lines (certain symptoms may be reduced);

**Mouth Toxins** – 80% of dogs and 70% of cats have periodontal disease by age three, dumping toxins into their bloodstream;

**Seasonal Problems** (allergies in spring and fall; indoor dry skin in winter);

**Bites** from insects, snakes and rodents can cause serious problems in your pet;

**Pollution Runoff** in lakes and on city streets (i.e., industrial waste have toxins and irritants);

**Environmental hazards** from:

- The Vet's office
- Neighborhood pets
- Toxins carried on the shoes of visitors.

Keeping your pet safe is an uphill battle. That's why it is so important to strengthen your pet's immune system every day with **NuVet Plus®**.
